SQL DATA TYPES + TABLE OPERATIONS

Contents

Task #5

Write a few lines about Data Types in SQL with examples:

- The data type of a column defines what value the column can hold: integer, character, money, date and time, binary, and so on.
- Each column in a database table is required to have a name and a data type.

Most commonly used data type:

String Data type	Example
Varchar	"Country" nvarchar
Char	"CustomerID" nchar

Numeric Data type	Example
Small int	"UnitsInStock" "smallint
integer	"CategoryID" "integer"

Numeric Data type	Example
DATETIME	"BirthDate" datetime
